Welcome to the FSA Portal

This portal is your source for information about the Florida Standards Assessments.

Florida's K-12 assessment system measures students' achievement of Florida's education standards, which were developed and implemented to ensure that all students graduate from high school ready for success in college, career, and life. Assessment supports instruction and student learning, and test results help Florida's educational leadership and stakeholders determine whether the goals of the education system are being met.

POLICY

Florida students are achieving more than they were two decades ago because of a robust education accountability system. In 2014, the Florida Department of Education chose new statewide assessments to ensure accurate measurement of student knowledge. A newly-adopted school grading system will simply and clearly convey the achievement level of Florida's schools and lead to improved student outcomes.
